CFA Level 1 Candidate | Consumer Psychology · Finance · Market Research · Strategy

EDUCATION

UNIVERSITY OF TORONTO Toronto, Ontario
Honours Bachelor of Science (HBSc) – Psychology, Biology May 2026
High Distinction | Dean’s List (2023–2026)

Relevant Coursework: Statistics, Judgment & Decision-Making, Behaviour Modification, Psychology & Money, Social Psychology, Business, Advanced Research Methods, Psychology of Prejudice, Cognitive Neuroscience.

CFA INSTITUTE - CFA Level 1 Candidate Expected February 2027

SKILLS

Research & Analysis	Finance & Quantitative	Communication	Tools	Ethics & Compliance
Consumer behaviour analysis.	Econometrics	Conference-style presentations.	Python	TCPS 2: CORE 2022
Statistical analysis	Portfolio management fundamentals	Research summaries	SQL	Good Clinical Practice (GCP)
Literature review	Quantitative reasoning	Academic manuscript writing	R	Responsible Conduct of Research (RCR)
Questionnaire design	Financial markets	Social media campaigns	Excel	Retrospective Review of Health Records.
Survey administration	Financial Modeling	Grant writing		

Areas of Interest: Behavioural Finance, Nudges, Consumer psychology, Market Research, Judgment and Decision-Making, Marketing, Behavioural Research Methods, Biases and Heuristics.

EXPERIENCE

CONSUMER BEHAVIOUR AND PSYCHOLOGY, UofT Department of Management Toronto, Ontario
Research Assistant September 2025 – May 2026

- Under the mentorship of Dr. Pankaj Aggarwal
- Conducted 4+ large-scale literature reviews (220+ articles) on consumer judgment and market behaviour, synthesizing insights on AI role framing, brand anthropomorphism, and counterfeit consumption into clear narratives.
 - Translated academic research into actionable insights by identifying patterns in consumer behaviour and deriving implications for business strategy, branding, and decision-making.
 - Drafted a full SSHRC-style grant proposal, integrating theory, prior research, and experimental design to address questions around authenticity and moral meaning in consumer behaviour.
 - Authored ~10 pages of an academic manuscript (introduction, theoretical framework, hypotheses), structuring complex ideas into compelling, logically grounded arguments.

THERAPEUTIC INTERVENTIONS FOR PSYCHOSIS LABORATORY Toronto, Ontario
Research Assistant May – August 2025

- Collected **behavioural and cognitive data** from participants with using validated clinical assessments.
- Conducted **data entry, participant interaction, and debriefing**, in rigorous compliance with TCPS 2: CORE 2022, Good Clinical Practice (GCP), Responsible Conduct of Research (RCR) ethics protocols.

ACADEMIC PROJECTS

A CONSUMER BEHAVIOR PERSPECTIVE ON CANADA’S GROCERY OLIGOPOLY
Examining how brand identity, multi-brand strategy, and dynamic pricing drive market share across major Canadian retail & grocery conglomerates.

- Analyzed **market and consumer data** across major Canadian grocery conglomerates, identifying behavioral shifts related to brand identity, multi-brand strategy, and dynamic pricing models.
- Formulated evidence-based hypotheses on market share fluctuations, translating complex pricing and brand data into clear, strategic conclusions.

- Developed **thought leadership narratives** explaining the broader commercial and economic implications of Canada's grocery oligopoly for retail stakeholders.

INTEGRATIVE RESEARCH POSTER PROJECT - UofT

Utilizing microfluidic technology for scalable, efficient and customizable lab-grown meat production, catering to the growing global demand for sustainable dietary options.

- **Synthesized literature** from multiple disciplines to design a research proposal, applying critical thinking and decision-making frameworks relevant to both **scientific and consumer contexts**.
- Worked collaboratively to create and present a scientific poster during a conference-style session.

MULTIMEDIA DOCUMENTARY PROJECT - UofT

The effects of a viral infection on host metabolism and energy diversion.

- **Critically evaluated scientific literature** to formulate arguments about the viral hijacking of immune systems.
- Collaborated effectively with peers to create a documentary-style video that relays complex scientific information using engaging audience-centered storytelling techniques, visual aids, and humour.

ECOLOGY AND EVOLUTIONARY BIOLOGY LABORATORY - UofT

Field, lab and computational approaches to ecology and evolution.

- Collected data through field and lab experiments to explore population genetics, community ecology, and biodiversity.
- Processed and analyzed data through **Python, R and Excel** to model ecological processes and visualize trends.

TRAVEL VIDEO PROJECT - UofT

From City to Sanctuary: A Travel Video through the Ma Moosh Ka Win Valley Trail

- Directed and produced a travel video, leading photography, scripting, and narrative development to craft a cohesive story highlighting experiential and environmental themes.

LEADERSHIP AND EXTRACURRICULARS

SYNAPSE UofT

Toronto, Ontario

Vice President of Communications

September 2023 – May 2026

- Led a communications team to design and execute campaigns that made neuroscience accessible to a diverse student audience, applying behavioural principles to drive engagement and knowledge retention.
- Developed content strategy across social media and events, building trust and consistent brand voice for the organization.

PSYCHOLOGICAL HEALTH SOCIETY UofT

Toronto, Ontario

Director of Marketing

September 2023 – May 2026

- Created and implemented social media campaigns that promoted mental health awareness, applying behavioural insights to foster an inclusive community and encourage positive habits.
